Sole Source Justification for VR Systems Software

VR Systems, Inc. is based in Tallahassee, Florida. It currently has 51 employees including nine software developers and an experienced Help Desk team. VR Systems has a combined staff experience of over 150 years in computer programming, computer systems and elections. VR Systems, Inc. has an excellent reputation for its customer service to elections staff and provides support helplines 24/7 during major elections.

"Voter Focus" is a trademark of VR Systems and is both a software product and a software service. The Voter Focus product is designed and built by VR Systems, Inc. to meet the requirements of the Texas Secretary of State's Elections Division for voter registration and election management and was certified by the Texas Secretary of State on June 26, 2020. The product is kept up to date with changes in federal and state legislation, is reviewed regularly by its users and enhancements are added.

The Voter Focus System Interfaces include the Generic Electronic Pollbook Interface, the BlueCrest Relia-Vote Interface, and the Generic GIS Interface; these interfaces are proprietary to VR Systems, Inc. for the purposes of interfacing the Voter Focus product with third-party electronic pollbooks including the KNOWiNK Poll Pad, third-party ballot-by-mail and GIS mapping solution providers. These interfaces are essential to employ the full functionality of the Voter Focus software and allow election teams to maximize efficiency across these voter registration and election management functions.
