**SUBJECT: RFP NO. 2020-035 - CONSULTING SERVICES FOR
IMPLEMENTATION AND VALIDATION OF PUBLIC SAFETY
ASSESSMENT - CRIMINAL COURTS ADMINISTRATION - THE
JUSTICE MANAGEMENT INSTITUTE - EXERCISE FOURTH AND
FINAL OPTION FOR RENEWAL - SAME CONTRACT TERMS**

***** CONSENT AGENDA *****

COMMISSIONERS COURT ACTION REQUESTED

It is requested that the Commissioners Court approve renewal of RFP No. 2020-035, Consulting Services for Implementation and Validation of Public Safety Assessment, with The Justice Management Institute, for the fourth and final optional twelve (12) month period at the same contract terms.

BACKGROUND

On April 21, 2020, the Commissioners Court, through Court Order #132632, awarded RFP No. 2020-035, Consulting Services for Implementation and Validation of Public Safety Assessment, for Criminal Courts Administration, to the following vendors:

Primary	The Justice Management Institute
Secondary	Justice System Partners

The awards were based upon evaluation criteria set forth in the RFP specifications and contained options to renew for four (4) additional twelve (12) month periods.

On April 6, 2021, the Commissioners Court, through Court Order #135174, approved the first renewal option.

On February 1, 2022, the Commissioners Court, through Court Order #137411, approved the second renewal option.

On February 21, 2023, the Commissioners Court, through Court Order #140325, approved the third renewal option with The Justice Management Institute. Justice System Partners elected not to renew.

The Public Safety Assessment (PSA) is a risk tool utilized by judges and magistrates during the setting of bonds. This tool is designed to estimate the likelihood of two (2) key outcomes for individuals awaiting trial: failure to appear in court and re-arrest. The PSA was implemented as a risk tool for the County in April of 2021 and was validated in June of 2023. This final contract renewal will allow for a second validation. Validation is the process of rigorously assessing how well the PSA tool performs. It involves using historical data from a representative sample of the population that the tool will be applied to and comparing the PSA's predictions against the actual outcomes.
