Service Call: Unit has a power issue.

Technician arrived to customer site and located unit. Inspected unit and found unit has no battery but uses external power source. Coordinated with customer and located available power cable. Installed to unit and plugged into outlet. Tested operations and found platform functions unresponsive. Tested circuitry throughout unit and found proper power through distribution box. Further inspection found no output through transformer. Notified customer of findings. Customer requested to order part. Ordered parts. While picking up parts customer contacted technician informing technician additional vender completed repairs. Parts returned.
