To whom it may concern:

Thank you for your interest in Noble CaseManager. Noble offers the same features found in other assessment platforms, but has many proprietary innovations that cannot be found in competing products. The items listed below are proprietary innovations:

1. The PSA in CaseManager the only version containing the specific scores, thresholds, models, and reports that conform to the custom PSA created for Tarrant County's pre-trial population.
2. The PSA in CaseManager is the only version containing the specific business logic developed by Tarrant Country Criminal Courts.
3. The software is entirely based on Microsoft's .NET framework
4. Provides a form authoring tool that allows for end users to create scoreable assessments and non-scored forms for easy data collection.
5. An automated inter-rater reliability site designed to offer your staff the ability to watch professional interviews, complete assessments on those videos, and have the results of the completed assessments compared to a model assessment completed by experts.
6. Noble's software supports transfers of individuals' assessment and case plan data between other agencies that also use Noble's software.

Noble Software Group, LLC is the only supplier of CaseManager and there are no other authorized resellers.

We think that you will find, as our customers have, that these features set our product apart in terms of functionality and overall efficacy.

Sincerely,
Aaron Picton
CFO
