

National Office
Council of State and Territorial Epidemiologists

To Whom It May Concern,

Congratulations on being accepted to CSTE's Data Science Team Training program for the 2023 program year! The Council of State and Territorial Epidemiologists (CSTE) is pleased to support the team from Tarrant County Public Health participating in this program (individual team members listed below). DSTT is a team-based, on-the job training program to promote data science upskilling at public health agencies. Learners in the program work collaboratively on a project that addresses a current agency need related to DMI. To support their learning, these individuals will all be provided access to the Coursera online learning program.

Additionally, as part of the program, the team has access to a training stipend or professional development allowance of \$10,000. These funds will be distributed to the team members via reimbursement for approved expenses. Approved expenses may include but are not limited to training, books, and other Data Modernization Initiative-related expenditures to achieve their project goals. All purchases must be made no later than 12/31/2023. There is no penalty for unspent funds.

Project Title: Modernizing Public Health Reporting for Accelerated Data and Effective Communication

Team Members:

Grace Goulet

Micky Moerbe

Rony Cazares

Coulter Galvan

Patrick Rekieta

Please contact me at baylward@cste.org with any questions or for more information.

Sincerely,

Bernadette Aylward, MPH (she/her)
